Commercial-Flow*	\$2.40/ccf

* Based on winter use

Check the lot size and house size on your bill, to make sure the water budget is correct for your property. The total monthly allocation, or water budget, for each residential account is determined by these factors:

- Lot size
- House footprint
- Real-time weather
- Number of days in billing period
- Horticultural science
- Indoor allocation

Lot Size and Residential Allocation

*Standard allocation:
7,000 sq ft lot*

Larger lots = tailored allocations, by lot size;

Landscape accounts receive the same outdoor allocation per square foot.

Stage 2 Water Alert restrictions have been rescinded following the Governor's termination of the drought state of emergency. Drought Limit penalties have been discontinued and customers no longer need to limit their outdoor irrigation to two days a week on assigned days. Permanent restrictions prohibiting wasteful water practices remain in place. Thank you for your efforts to continue conserving water.
